

# Glassics™

1630-01 Chrome Diamond Plate

Outside

Inside

Sharpline's Glassics™ now offers something new in rear window graphic designs. Glassics™ Diamond Plate rear window film provides a true chrome diamond plate appearance that complements the appearance of any size of pickup. While the image shows bright and shiny on the vehicle's exterior, the view from the interior is similar to that of a tinted window. Best of all, Glassics™ are extremely easy to install, giving you a simple way to create a complete vehicle transformation in a matter of minutes.

The Glassics™ product offering also features two patriotic themed graphics created by digitally printing crisp, vivid colors onto perforated one-way window film. Each Glassics™ panel measures 24" x 65", allowing the same graphic to be installed on either the smallest compact or the largest fullsize. Once applied, the excess material is simply trimmed away, leaving a professional looking installation that can be accomplished by a novice installer.

Call your Sharpline Automotive representative today at (800) 888-4888 to order your favorite Glassics™ designs.
